

Swissquote Bank launches online trading on US stock markets

From now on, Swissquote Bank's customers (<http://bank.swissquote.ch>) can access the NYSE, NASDAQ and AMEX American stock markets, in addition to the SWX and virt-x. The launch of this new functionality for American stock exchanges completes Swissquote Bank's offering for securities trading. Swissquote Bank's terms are practically as favourable for dealings on American stock markets, as for trading on the SWX. The market is open from 15:30 to 22:00 (Swiss time) from Monday to Friday. Orders can be placed 24 hours per day.

The financial portal (www.swissquote.ch) features real time information on securities that can be traded on American exchanges. In addition to trading on major stock markets, Swissquote Bank customers can trade on the foreign exchange market 18 hours per day, with accounts in CHF, EUR and USD.
